

BORAL BRICK

**PLANT 130
UNION CITY, OK
UNLOADER**

Unloader

Boral requested a “simple” unloader that can unload a 24 Kingsize wide kiln car. The request for was for no counting and minimal inspection. ASI answered this request with a unloader that is simple but operates at the required rate.

Special six gripper deheading head that spreads and rotates

The cars are unloaded using a six gripper deheading head and brick are set down on marshaling conveyors for consolidation and inspection.

Automated Solutions, Inc.
P.O. Box 520
370 County Road 1671
Knoxville, AR 72845

The void table spreads the required number of brick for the void layer and a special void brick gripper transfers them to the stacker elevator.

The Void Table

ASI’s engineers worked with Boral’s personnel to develop an unloader that will serve the new plant for years to come.
